ABOUT US

Welcome! Fellow explorers

With a deep love for the outdoors and nature Aventura Camper Vans was brought to life.

A husband & wife team living within a big city we would always find ourselves being drawn like a magnet back to nature. It was only here we felt the stresses of life melt away and our creativities bubble over.

Whether it was a long day hike through the tall pines or a light evening stroll being in nature was always where our hearts and minds were at ease.

With our kids now grown we decided to launch Aventura Camper Vans. We longed to share our love and enthusiasm for the outdoors and the flexibility and comfort that van life offered. We are so happy that your search brought you to our page. We hope you will join us and find your inspiration and peace in nature's perfect setting.

SAFETY

ABSOLUTELY NO DRIVING OF THE VEHICLE WHILE UNDER THE INFLUENCE OF ANY SUBSTANCE

EMERGENCY - CALL 911

Fire extinguisher

is located behind the passenger seat and next to the side door

First aid kit

is located under the bed in garage storage

LP, smoke, detectors are located above the kitchen countertop.

Travel within the speed limit and in accordance with road and traffic conditions

Do not drive on dirt road (only well maintained) more than 2 miles and keep your speed to 15MPH.

Always fasten your seat belt while driving.

Avoid driving in strong wind and severe weather.

ABOUT

Travels were always an important part of our life. We used to go hiking with the tent just to get out of town for a weekend. When we got older, we desired we need a bit of luxury while traveling, so we desired to but this RV. It allowed us to comfortably travel , and it served us extremely well during many adventures. We often drive to Lake Mead and spend a weekend off-grid.

This motorhome has some amazing features like hot water shower, big water tank and solar system which allows you to enjoy nature and still have comfortable bed, and proper dinner.

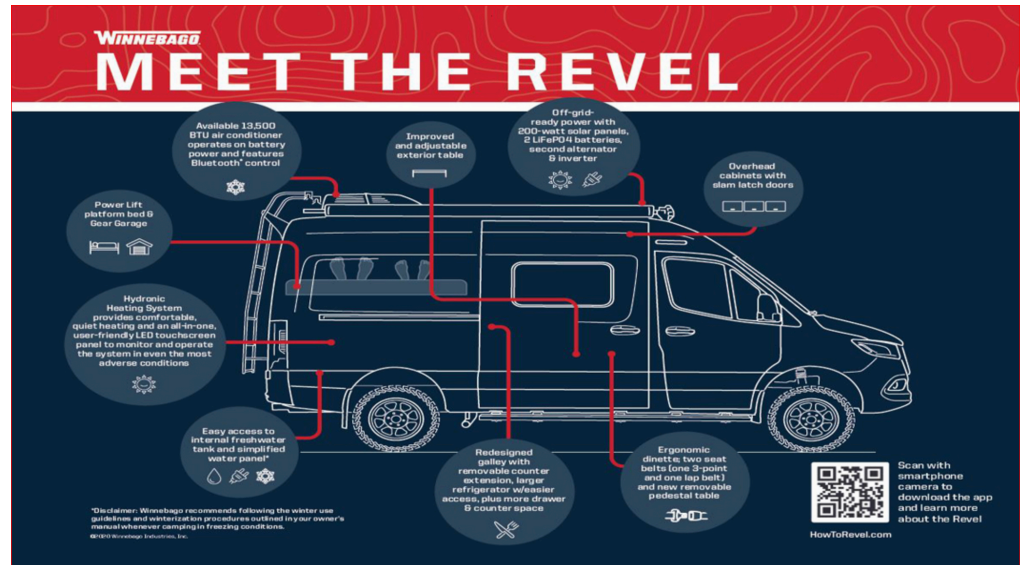

Why do you go away? So that you can come back. So that you can see the place you came from with new eyes and extra colors. And the people there see you differently, too.

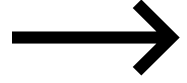

DETAILS

Exterior height: 10'

Exterior length: 19'7"

Exterior width: 7'1"

Mercedes® Chassis

3.0L PFI V6 engine - **DIESEL #2**
ONLY

NO DIESEL#1 OR BIODIESEL

Fuel Capacity: 24.5 gal

Freshwater Tank: 21 gal

Holding Tank – Black: 5 gal

Holding Tank – Gray: 21 gal

Basic info

- Sleeps: 2-3
- Kitchen with stove and sink
- Bathroom with hot shower and cassette toilet

COCKPIT

Driving position

On the bottom of the driver's seat, you will find 2 levers to regulate seating position. Adjust distance from steering wheel, reclining level and lumbar support.

Privacy Covers

You can cover from window screen for more privacy inside. Covers are located behind the passenger seat, and they clip on magnets along the window. Black side should be facing inside.

Gps

Mercedes is equipped with Gps navigation system and owners can locate Campervan anytime and also remotely unlock doors in case of emergency.

Swivel seat

Pull up on lever on bottom of the seat. This will release the swivel mechanism. And allow the chair to move, the chair will lock into place at 180 degrees turned all the way.

Tool box

Over seat there is a tool box with miscellaneous like duck-tape, flashlight, tools, emergency road kit is located in garage under bed.

HOUSE RULES

1

NO SMOKING

Smoking inside the camper is strictly prohibited. A smoke detector is installed.

2

FUEL DIESEL #2 ONLY

No biodiesel no diesel #1

3

DRIVING SAFETY

Make sure all loose things are secured and do not leave them on countertops. Do not pack any heavy items into overhead compartments.

4

KEEPING IT TIDY

Don't wear shoes inside and keep it tidy. Flush only RF SAFE toilet paper.

5

REPORTING DAMAGE

Things happen, and we totally get it, but we ask you to report any damages and/or breakages in a reasonably timely manner.

6

NO OFFROAD AND NO FESTIVALS

TOILET

Lightly press the button to release water into the bowl of the toilet.

Moving lever to right side will open the base of the toilet bowl and release the contents into the black tank.

USE ONLY RV TOILET PAPER - WE PROVIDE IT.

WATER USE

Our fresh water tank has 21gallons, so it's not to big for a camper, but still you have to be very conscious about your water use when you don't have a water supply. To give you an idea, one shower at home a 10-minute shower would use somewhere close to 25 gallons.

THINK FIRST THEN RUN THE TAB.

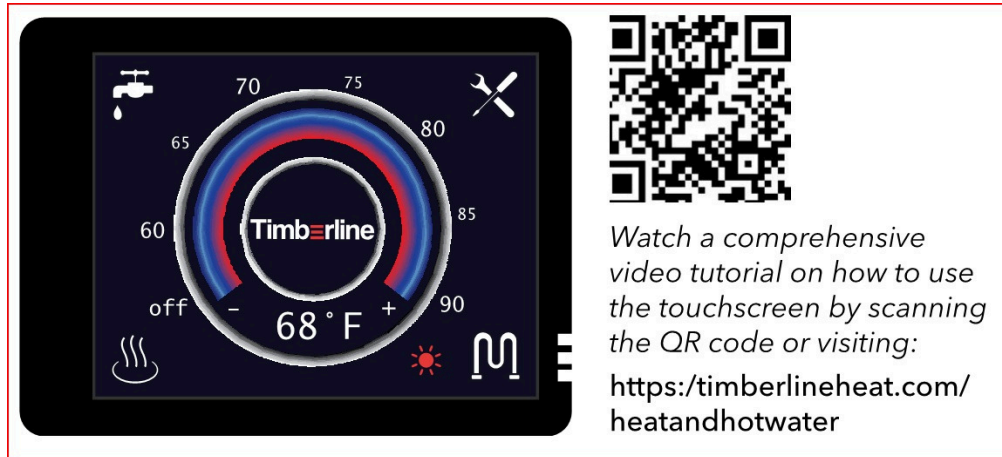

BEDS

There are 2 sleeping places in the RV. Single master foam mattress is no doubt the most comfortable option. Second best would be a luna bed. To assemble, install luna bed on top of front seats .

ELECTRICAL SYSTEM

How to control the system with the touchscreen

The best way to use the Timberline system is to enable the burner, the electrical element, and the hot water icon. The Timberline system will self manage, prioritizing the element if the coach is plugged in and only using the diesel/gas burner as needed. When its cold outside, set the thermostat to your desired temperature and the system will manage energy while maintaining the selected set point. If you are utilizing multiple 120V appliances at the same time (Coffee maker, AC, etc) you can turn off the electric element to conserve amperage and the Timberline system will maintain hot water and heat via the diesel burner. If you want to conserve diesel you can choose only the electric element. Note: The electric element is limited in energy and will not provide as much hot water or keep the coach warm in colder temperature

IF YOU ARE UNSURE ABOUT ANYTHING, PLEASE ASK

KITCHEN

STOVE

Induction stove allows you to easily cook a proper dinner. To turn in on simply press and hold the power button and then choose temperature.

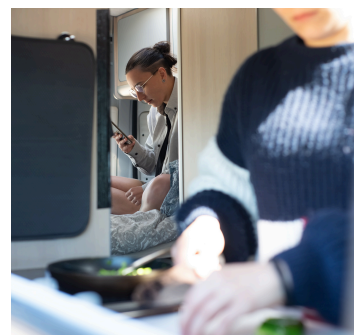

FRIDGE

The fridge with freezer compartment will allow you to stock up on some fresh produce and stay off-grid longer. To make it more efficient, don't put any warm produce inside.

SINK

Stainless steel sink with single lever faucet and pullout sprayer.

BBQ (Optional)

Cooking outside is the best part of any RV trip. In the rear storage you will find gas grill and gas bottle, so you can enjoy some BBQ deliciousness. Please clean the grill after use.

KITCHENWARE

List of included kitchenware - for 4 people:

- Pots (small, medium and large)
- Pans (1 medium frying pan)
- Pot Holder or Pot Grabber
- Plates and Bowls
- Drinking Glasses

Sleeping

- Bathrobes
- Earplugs

Electronics

- iPads/Kindle
- Computer/Laptop
- Camera
- Video camera
- Chargers with plug
- Portable speaker

Personal items and toiletries

Outdoor fun gear

Clothing

DEPARTURE CHECKLIST

Retract the awning and lower the antenna completely.

Put away any loose items, lock all the cabinets doors. Put down toilet seat and lid. Close all the windows and vents.

Turn off all the lights and the AC/heater and water heater.

Disconnect all the hookups (water, electricity, sewage) and remove leveling equipment.

Release emergency break, put Tow Mode on and hit the road!

SETTING UP A CAMP

CHOOSE RIGHT SPOT

Look for the spot that will fit a 30' vehicle. Preferably use spotter outside. Check the surrounding first!

Try to choose level spot. Use leveling blocks when necessary. They are stored in the rear storage.

Turn off the engine and engage the parking brake.

CONNECTIONS

Before plugin in, turn off the breakers. Connect 30AMP cord (it is stored in side compartment) and turn breakers on. If the place is 50AMP, you can connect only with adapter.

Connect your water hose to the spigot and the hose to your RV's city water inlet on the side. Open spigot.

EXTRAS

Put on cab window cover and lock the cab doors.

Put awning out using switch located next to sliding door on cabinet. Do not use it when windy and don't leave it through the night.

WASTE DUMPING

WEBSITE TO LOCATE DUMP STATION ARE sanidumps.com AND RVdumps.com
YOU CAN ALSO USE APP iOverlander and Campendium

The freshwater tank holds your clean water.
This is the RV water tank that supplies
water to your RV sink and shower.

**DUMP WHEN TANKS ARE 3/4 FULL OR AT THE END OF A TRIP.
FIRST BLACK TANK THEN GREY ONE - ALWAYS!**

1. Park near sewer drain. Close the RV's windows and vents to keep noxious smells and fumes outdoors.
2. Secure the L shaped end of the hose to the valve at the sewer line or dumping station. Next, hook up hose to the black tank valve on the side of the RV.
3. Pull the black water tank valve handle located next to sewer hose connection to empty the toilet waste first. Allow it to drain completely. Close the black tank valve.
4. Repeat for the gray water tank.
5. Disconnect hose from RV, lift it to drain any remaining water into the dump inlet and rinse by connecting to the dump station's water supply - NEVER USE RV FRESH WATER!

NEVER PUT ANYTHING IN THE BLACK WATER TANK OTHER THAN BIODEGRADABLE RV TOILET PAPER. ALSO, DON'T BE PUTTING ANY FOOD IN THE KITCHEN SINK! REMEMBER, THE GRAY HOLDING TANK SYSTEM CAN GET CLOGGED TOO!

How to travel safely with your RV

Perform walk-around visual inspection before embarking on trip. A pre-trip checklist should include things like

- Retract awnings
- look under rig for signs of fluid leaks
- Release parking brake
- Inspect tires
- Disconnect all water and sewer lines
- Check your surroundings (weather, overhangs and ground hazards)

Practice SAFE cornering

- Slowly approach the turn. It's much easier to maneuver a corner with a lower speed.

Know your height

- Winnebago Revel height is 9'11"

Avoid unexpected blowouts

- Watch your tire pressure. Both under and over inflation can lead to blowouts. To help prevent this, check your tire pressure before you start your trip. You can access tire pressure on driver display.

Other Winnebago Revel specifications

- Length 19 ft 7 in
- Height 9 ft 11 in
- Exterior Width 7 ft 1 in
- Freshwater tank capacity 21 gallons
- Gray waste tank capacity 21 gallons
- Black tank capacity 5 gallons
- Fuel capacity 24.5 gallons **DIESEL NUMBER 2 ONLY**

EMERGENCY PROCEDURES
